

Dear Property Resident,

Flyway Excavating will be installing new stormwater drainage pipe and associated facilities and will also be repairing erosion issues in the 300 block of E. Glencrest Road. This work will require the 24/7 closure of E. Glencrest Road between Coronet Drive and Brick Row for an extended period of time. Access will be provided to property residents within the area of the road closure only. Through traffic will not be permitted nor possible beyond the road closure signage as the roadway will be fully barricaded in front of 359 E. Glencrest Road. Flyway Excavating is contracted through Valley Township and the City of Coatesville to complete this work. We are anticipating that the closure of E. Glencrest Road will start on March 11, 2024 and will continue through mid-May. Our working hours are typically from 7:00 am to 3:00 pm, Monday through Friday. There will be signage installed on February 26, 2024 notifying you of the upcoming road closure. The detour signs will be installed by March 8, 2024 in advance of the road closure on March 11, 2024.

If you need further information, please feel free to utilize the following project contacts:

Valley Township: Janis Rambo, Township Manager, 610-384-5751

Project Engineer: Michael Ellis, PE, Pennoni Associates Inc., 302-351-5236

Project Contractor: Pete Hartmann, Flyway Excavating Inc., 717-560-0731

Thank you in advance for your cooperation.

Sincerely,

Pete Hartmann
Project Manager
